Book Manuscripts in Process:

- Robin Stryker (with Richard Serpe and Brian Powell), editors. *Identity and Symbolic Interaction: Deepening Foundations; Building Bridges*. (Book Prospectus Available, Contract with Springer, October, 2017, publication date 2019).

The purpose of this thematic edited volume is to deepen and build on identity theory's centrality within social psychology and its foundations within structural symbolic interaction, while also enhancing bridges not only to other prominent sociological subfields, but also to other theoretical perspectives within and beyond sociology. The former include law, health, education, race and ethnicity, immigration, politics, and inequality; the latter include network theory, rational choice theory, exchange theory, stress process theory, personality psychology, and cognitive and neuro-psychology. Chapters are currently being written for presentation on April; 13-14, 2018 at the *Indiana University Identity Conference: Building on the Legacy of Sheldon Stryker*. Contracted publication date for completed volume is 2019.

Robin Stryker. *Social Science for Equality? The Politics of Social Science in United States Employment Discrimination Law*. (Book prospectus nearly complete).

Social, behavioral and economic science (SBE) may—or may not-- promote construction and institutionalization of statutory and enforcement frameworks for civil rights that focus on systemic group disadvantage rather than individual harm, discriminatory consequences rather than discriminatory intent, and substantive group results rather than individual justice,. Where SBE does so, it plays an important role in producing legal doctrine that effectively reduces disparities in economic, social and political life chances between advantaged and disadvantaged societal groups (Pedriana and Stryker 2017). Building on my “politics of social science” theoretical framework and my strategic narrative methodology (Stryker 1996), this book provides the first systematic over time account of how, by whom, under what conditions, and with what consequences, various kinds of sociological, psychological, economic, and statistical expertise have been mobilized to enforce Title VII of the 1964 Civil Rights Act and the Equal Pay Act of 1963.

Using Monahan and Walker's (1986, 1987) typology of “social facts,” “social authority” and “social frameworks,” the book first analyzes how SBE has been used both in leading cases and a representative sample of Title VII and Equal Pay Act federal district and appellate court cases from 1965-2014. Examining the relationship between this typology and Pedriana and Stryker's (2017) “group-centered effects (GCE)” framework for assessing how variable legal doctrine facilitates or inhibits the production of equality *through law*, the book then examines politicization of social science—and its outcomes – across eight key event sequences in the evolution of federal employment discrimination law, comparing short and long run effects for civil rights legal doctrine and institutions.

The series of comparative narratives grounds four general theoretical propositions. *First*, SBE is an essential resource for enhancing the capacity of law to promote equality-producing social change. *Second*, reliance on SBE in US civil rights law is more likely to have egalitarian impact to the extent it is used successfully in support of doctrine conforming more rather than less to the ideal-typical GCE framework. However, *third and fourth*, SBE in civil rights law is more vulnerable to sustained legal and broader political attack, and more likely to be selected out of adjudicative law 1) to the extent it promotes doctrine inconsistent with competitive- individualist market values and market institutions; and 2) to the extent it promotes doctrine conforming more rather than less to an ideal-typical GCE approach.
